EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, paragraph 1: after "July 11, 2001," insert "--now U.S. Patent No. 6,626,538-- and after "TREATMENT OF MYOPIA" insert --."--

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:
3. The prior art of record does not disclose or render obvious a method of calculating a predicted lens power to correct myopia using an intraocular lens, wherein measured pre-operative and post-operative eye characteristics are used in a lens power prediction model with coefficients as defined in the instant claim. The use of the measured characteristics including axial length, anterior chamber depth, pre-operative steep keratometry and average keratometry, as well as predicted and/or desired characteristics such as post-operative manifest and cycloplegic spherical equivalent and predicted change in average keratometry, within a prediction model with specific coefficients as set forth in the claim is not disclosed by the prior art, nor is there a teaching in the prior art that necessarily results in the predictive model as claimed without undue experimentation. Thus the predictive model and the application of said model in a predicted lens power methodology is regarded as novel and patentable subject matter.
